DETAILED ACTION

Drawings

1. The drawings are objected to because in figure 3, the signal reference "RIN" indicating the output signal of the array side should read —SIN--. And in figures 4A and 4B, there are extra "EQUALIZATION PULSE" and "EQUALIZE PULSE" references. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 20-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As for claim 20, "a flash cell" in line 9 should read –a reference flash cell—to be different from a flash cell coupled to a first drain bias network in line 8. Also note that there should be only one period (.) at the end of the claim.

As for claim 24, "a persistent memory" in line 4 should be --a reference persistent memory—since "a persistent memory" has already been used in line 2.

As for claim 26, "a persistent memory" in line 3 should read --the persistent memory—since it refers to the "persistent memory" in claim 24.

Application/Control Number: 09/896,446

Art Unit: 2818

Claims 21-23 and 25-26 are also rejected for depending on and including the limitations of claims 20 and 24 respectively.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanaka et al. (U.S. Patent 5,559,737).

The Tanaka et al. patent discloses all the limitations as claimed in the instant invention. In the embodiment illustrated in figure 2, Tanaka et al. shows a flash cell (transistor 1) coupled to a first drain bias network (comprising of elements 4-7), a reference cell (11) coupled to a second drain bias network (comprising of elements 14-17), an equalizing transistor (91) coupled to input nodes of the first and second drain bias networks for equalizing the potential thereof, and a sense amplifier (20) coupled to the outputs of the first and second drain bias networks. The method claims of the instant invention read on the circuitry of Tanaka et al. comprising equalizing input nodes of the first and second drain bias networks and sensing the voltage difference between the outputs of the first and second drain bias networks.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tanaka et al. (U.S. Patent 4,884,241), Kumakura et al. (U.S.

Application/Control Number: 09/896,446

Art Unit: 2818

Patent 5,519,652) and Fournel et al. (U.S. Patent 6,307,797) teach methods and circuits for equalizing and sensing voltage differences at output nodes of a flash cell and a reference cell.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Son Mai whose telephone number is 703-305-3497. The examiner can normally be reached on 7:00 am to 6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on 703-308-4910. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7724 for regular communications and 703-308-7724 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
